

Verified AIOps Integrations Optimize IT Tools & Automate Workflows for Increased IT Ops / DevOps Efficiency

Full Technology Stack Visibility

Moogsoft integrates with your favorite IT tools, allowing you to customize your workflows for full visibility into the IT services running your business.

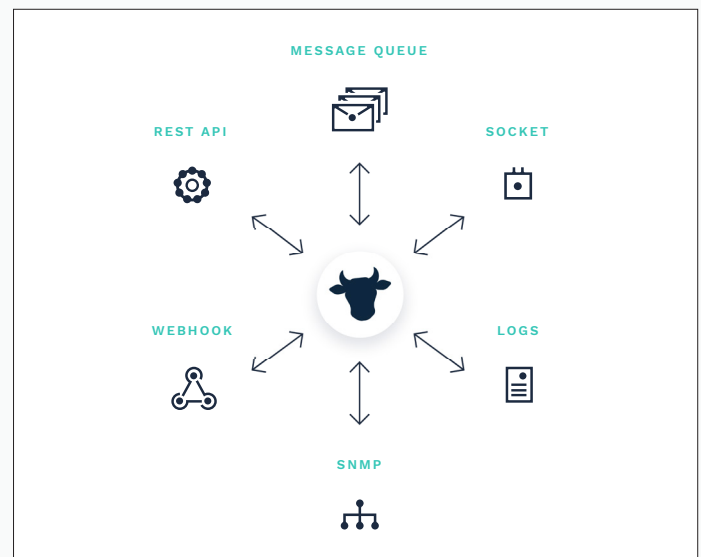

You are also able to efficiently and effectively investigate issues, reduce downtime, and assure that your business services remain continuously available – all from one integrated view.

- Application Performance Monitoring
- Change / Deployment Management
- Cloud Services Monitoring
- Communication & Collaboration
- Dashboard & Metric Reporting
- Email
- Endpoint Agent
- Incident Management / Ticketing
- Infrastructure Monitoring
- Messaging & Queue Services
- Network Monitoring
- Notifications
- Streaming Data
- Website Availability Monitoring

Integrate Your Way

- **Validated** – For faster time To value, simply select the integration, configure the system options, and start working.
- **Custom** – Open APIs, webhooks, and bots expose logic, dataflows and request parameters to provide tailored processes.
- **Integration hub** – Leverage your organization’s libraries to stay current and consistent via our Integration Hub.

Bring Your Monitoring & Observability Data Together in One System of Engagement for Complete Visibility & Context

Deliver Integrated Workflow

- Quickly and efficiently build new integrations, and then customize your workflows for faster time to value.
- Use the power of bi-directional integration with your ticketing, notification and collaboration systems to engage the right individuals and teams faster, with better quality information, to keep everyone in sync.
- Easily draw from your existing configuration, topology and system of record repositories to enrich alerts and incidents, so your organization’s key data assets assist in effective decision making
